Kerala Police ERP - Official Implementation Record

Phases 4-10: Advanced Operations & AI Integration

Generated: 2026-03-29 00:04

[Media Assets Not Loaded]

PHASE 4: ELITE ROLE EXPANSION

OBJECTIVE: Integrate specialized administrative and front-line roles into the security module.

IMPLEMENTATION: Added Role.FORENSIC_EXAMINER, PROSECUTOR, JAILER, PRO, and EMERGENCY_DISPATCHER to the authentication system. Updated Role Based Access Control (RBAC) in LoginDialog.

PHASE 8: AI ROUTING ENGINE & CITIZEN PORTAL

OBJECTIVE: Automate complaint routing and launch the statewide public dashboard.

IMPLEMENTATION: Developed 'ComplaintAssignmentService' implementing a keyword-driven AI parsing engine. High-priority keywords trigger an 'EMERGENCY_DISPATCH_112' status. Launched 'index.html' with real-time stats (Total Cases, Resolved, Stations Online).

PHASE 10: VERIFICATION & BRANDING

OBJECTIVE: Finalize UI aesthetics and perform end-to-end dry runs.

IMPLEMENTATION: Re-branded the Citizen Portal with a premium Dark Mode aesthetic, pulsing emblems, and dynamic response banners. Verified API endpoints and resolved database status enum constraints. Performed zero-warning build verification.

TECHNICAL STACK SUMMARY

Backend: Spring Boot 3.2.0, Hibernate ORM
UI: Java Swing (FlatLaf), Vanilla JS/CSS (Citizen Portal)
Security: BCrypt hashing, Audit Logging, AI Routing Override
